

EDUCATION			
YEAR	DEGREE / EXAM	INSTITUTE	CGPA / MARKS
2025-2027	M.Tech. (DSAI)	Indian Institute of Technology, Tirupati	7.44
2018-2022	B.Tech. (CSE)	Oriental College of Technology, Bhopal	8.91
2017	Senior Secondary	MPBSE Board	76.6%
2015	Secondary	MPBSE Board	89.83%

PROJECTS	
MediQuery — AI Medical Document Assistant	Jan '26 - Mar '26
Tools & Technologies: Python, LangChain, Llama-3, Ollama, ChromaDB, Gradio, PyPDF, Git.	
Identified hallucination risk in medical LLMs; designed offline RAG pipeline (PDF→chunk→embed→retrieve→generate) to ground answers in verified docs only. Implemented ChromaDB vector store with nomic-embed-text embeddings, indexing 10+ documents into 800-char chunks with cosine similarity retrieval in <2min. Deployed Llama-3.2(8B) via Ollama with top-4 chunk retrieval, achieving 0% hallucination rate and 40% faster response vs. naive full-doc prompting. Shipped Gradio web UI (50 lines) enabling non-technical users to query medical PDFs fully offline - no API key or internet required.	
FootVision - Automated Football Match Analysis	Oct '25 - Dec '25
Tools & Technologies: Python, YOLOv5, OpenCV, Kalman Filter, Optical Flow, K-Means, NumPy, scikit-learn, Git.	
Addressed manual stat-tagging bottleneck; built real-time video pipeline detecting 22 players/frame at 30 FPS with 85%+ accuracy using YOLOv5 + OpenCV. Applied Optical Flow for camera-motion correction and Perspective Transform to map pixel coords to real-world distances with <5% positional error. Designed 4-module agentic pipeline (tracker, team assigner, speed estimator, annotator) auto-generating per-player speed, distance, and possession stats.	

TECHNICAL SKILLS	
Programming	C C++ Python SQL
AI/ML	LLMs RAG Prompt Engineering LangChain ChromaDB Ollama
Computer Vision	OpenCV YOLOv5 Optical Flow
Libraries/Frameworks	Scikit-learn Numpy Pandas Matplotlib Seaborn Gradio HuggingFace Transformer
Web Skills	HTML CSS TailwindCSS JavaScript
Tools & Infra	Git GitHub VS Code Google Colab Jupyter

KEY COURSES TAKEN	
Machine Learning Artificial Intelligence Deep Learning Data Science Probability	

POSITIONS OF RESPONSIBILITY	
Founder NGO - HopeToHope Foundation	Present
Co-founded and managed the "For the People Wall" initiative in the college, enabling students to donate stationery, clothes, books, and essential household items for underprivileged communities. Coordinated donation drives by organizing collection, sorting, and distribution of essential supplies, ensuring resources reached people in need through the HopeToHope Foundation. Collaborated with volunteers and college stakeholders to promote social responsibility, increase student participation, and execute community welfare initiatives with the HopeToHope Foundation.	
Coordinator TechFizz, Oriental College of Technology	2018-2022
Coordinator NSS Unit, Oriental College of Technology	

ACHIEVEMENTS	
Cracked GATE exam with AIR-5691 in 2025(180,000) - top 3.2% 13 times State Volleyball Player	
CERTIFICATIONS	
Oracle Certification on Agentic AI Foundation Coursera Certification on ML Specialization By Andrew Ng Coursera Certification on Divide and Conquer Algo By Stanford
